Geoscientists

## Petroleum systems & risk elements of the offshore Atlantic Canada

\*Professor Grant Wach – Basin and Reservoir Lab, Department of Earth Sciences,  
Dalhousie University, Halifax, Nova Scotia

Sedimentary basins formed by the rifting and seafloor spreading that began in the Late Triassic, leading to the opening of the Atlantic Ocean (modified from Tankard and Balkwill, 1989; Decourt et al., 2000, among others).

All are welcome.
